

BINDER

Location-linked record - sample

Plans, points, notes, dimensions, and photos and files

Issued	September 20, 2026 at 1:13 PM
Source	generic-plan-input.pdf
Plan chapters	2 total • 1 with field points
Field points	2
Photos & files	2

How to follow this binder

Start at a plan chapter. Every root point carries a stable number such as P01-004; nested detail extends it, such as P01-004.007. Each point is followed immediately by its marked-up photos and files and nested branches. Use the visible Index, Plan, and Parent buttons in any PDF viewer; printed pages repeat the same point number in the footer.

Notes

Real source photographs, placed on a fictional plan for demonstration. The location mapping is illustrative, not a site record. Confirm exact locations and measurements on the actual job.

Notes

Example follow-up: capture a clear reference photo before assigning measurements to this location. No inspected condition or completed work is claimed.

Handoff summary

Location-linked record - sample • Sep 20, 2026 at 1:13 PM

WHAT THIS SAMPLE DEMONSTRATES

A reader can start at a numbered location, open its notes and photographs, and return to the plan. This is a synthetic example assembled from a generic plan and existing marketing photographs.

- Location A: two photographs, with context and detail kept together.
- Location B: a note requesting additional evidence.
- No dimensions, findings or locations are certified.

DEMONSTRATION ONLY

Private development preview. Do not use this Binder for fabrication, installation or site decisions.
