

PLOTAVA

SAMPLE FIELD PACKAGE

One field walk. One linked handoff.

This fictional example shows how Plotava keeps plan locations, field photos, measurements, and notes connected in one printable PDF.

HOW TO USE THIS SAMPLE

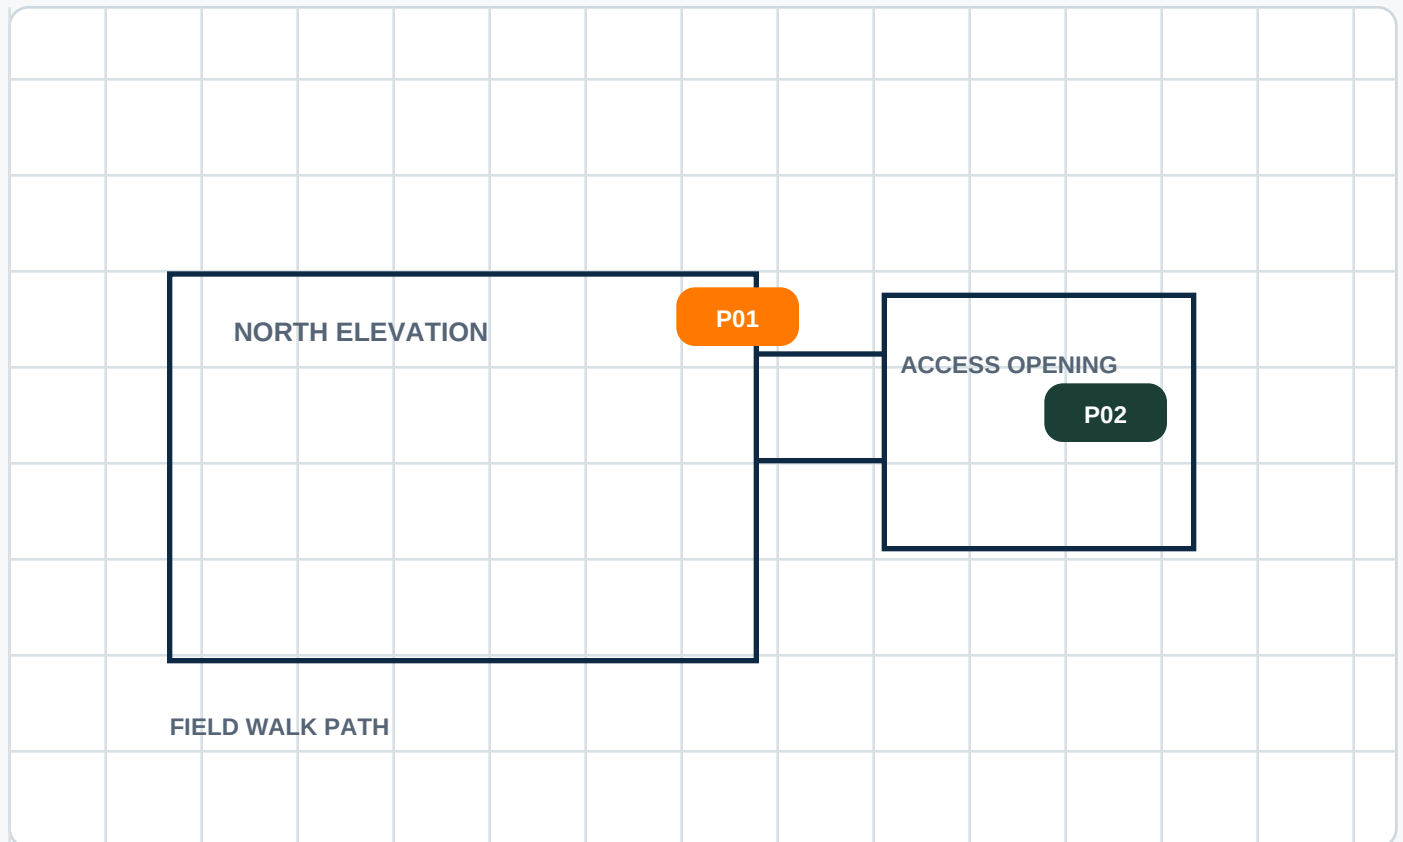

Open the Field Plan on page 2. Click P01 or P02 to jump to its evidence page, then use the back link to return.

Example only - verify all field conditions independently.

FIELD PLAN

Sample Site Walk - Plan Index

Select a numbered point to follow the evidence connected to that plan location.

FIELD POINT DIRECTORY

P01

North elevation opening

Photos, note, and 18 ft 12 3/8 in opening measurement

P01

North elevation opening

Sample condition attached to the Field Plan on page 2

FIELD MEASUREMENT

18 ft 12 3/8 in

Recorded at this exact plan point

FIELD NOTE

Record the clear opening and supporting condition before fabrication or installation. Verify in the field before relying on this example.

[BACK TO FIELD PLAN](#)

Concrete edge condition

Sample supporting condition attached to the Field Plan on page 2

FIELD MEASUREMENT

3 1/4 in offset

Recorded at this exact plan point

FIELD NOTE

Keep the photo, the recorded dimension, and the plan location together so the next person knows which edge was observed.

WHAT THIS PACKAGE PROVES

Every detail has a way back.

A Plotava Field Package gives the office, shop, installer, or owner a plan-led record. The field photo does not become an orphaned image and the measurement does not become a number without a location.

- Point P01 and P02 on page 2 link to their evidence pages.
- The evidence pages link back to the Field Plan.
- The original plan stays unchanged while field documentation is organized around it.
- This sample is fictional and does not certify a field condition or measurement.

PLOTAVA

Pin the location. Capture the evidence. Add context. Export one linked PDF.
